# KORSØR PROPELLER A/S

Korsør Propeller A/S is a worldwide supplier of CP Propellers for the merchant fleet. For decades Propellers have been our core business and today we offer a wide variety of CP Propellers.

At Korsør Propeller A/S quality comes first. We are always seeking the best solution for the customer, considering the purpose of the vessel and the customer's expectations of performance. Through dedicated co-operation with our customers and business partners we seek the challenge of always producing the optimized CP Propeller. The

propeller blade designs are made in close collaboration with the major maritime institutes of Europe.

Our production facility is situated in Korsør, a small town approximately one hour drive from Copenhagen. Together our employees are a dedicated team of enthusiasts knowing their CP Propellers and they all give the right commitment for success.

We should be pleased to serve you in future.  
Please feel free to contact us with your enquiry.

### QUALITY CP PROPELLERS

Korsør Propeller A/S is determined to produce quality CP Propellers. We are offering a variety of CP Propellers for a power rating of up to approximately 3 500 KW and propeller diameter up to approximately 4 000 mm.

Our CP Propellers are designed for heavy duty application. The design is always made to avoid cavitation, noise, and vibrations, and to obtain optimal speed and thrust, - considering the customers request. The overall designs of the CP Propellers are all done in-house, keeping the knowledge and purpose of our design close in hand thus enabling us to assist our clients in any possible way from our main office.

At Korsør Propeller A/S we co-operate with all well-known classification societies around the world. Every CP Propeller is classified at our factory so it is ready for installation at site upon arrival at the shipyard.

Korsør Propeller A/S has supplied CP Propellers for most commercial vessels:

- AHTS vessels
- Ferries
- Tankers
- Supply vessels
- Fishing trawlers
- Coast Guard vessels
- Anti Pollution vessels
- Dredgers
- Pilot vessels
- Super Yachts

### KORSØR PROPELLER A/S IS HERE FOR YOU

Whether you operate, install, or maintain your CP Propeller from Korsør Propeller A/S, we are here for you.

We know your business is 24/7 so please contact us in any urgent matters. We have a dedicated team of service engineers travelling all around the world to help our customers.

If you should need spare parts, start-up support, or service information in general, please contact us right away.

Korsør Propeller A/S manufactures CP Propeller systems both with – and without a built-in servo system (for OD box connection). The servo propeller type “ROS” is our latest development. We also produce the traditional push-pull rod system where the servo unit is part of the gearbox. By offering our customers these various solutions, Korsør Propeller A/S is able to match most gearbox makes preferred.
